TOTAL PETROCHEMICALS Polystyrene

Our Commitment

Total Petrochemicals is committed to providing its customers with high quality polystyrene products, outstanding service, and on time delivery.

Quality products come from operating top-notch facilities. Total Petrochemicals facilities worldwide are maintained to the highest standards, and are efficiently run and fully integrated.

Versatility, processability, and lot-to-lot consistency make our polystyrene the product of choice for packaging, consumer and institutional, electrical and electronic, and building and construction markets.

With production facilities in North America, Europe, and Asia, Total Petrochemicals is one of the largest polystyrene suppliers worldwide. Our Louisiana Polystyrene Plant is the largest single-site facility in the world, with 1.65 billion pounds annual capacity.

Total's polystyrene facility maintains an impeccable safety and environmental record.

Research and Technology

The Total U.S. Research and Technology Center, working in close collaboration with our research centers in Europe, is dedicated to keeping customers at the forefront of technology advancement in polystyrene.

Located in Texas, the research, development, and applications facility is equipped with the most sophisticated hardware in the industry, including a state-of-the-art pilot plant. Working with our Technical Service Specialists you can test your ideas, evaluate resins, explore more efficient production techniques, develop new products and find solutions.

We are dedicated to developing better products and supporting our customers. Total Petrochemical can help you develop your ideas, create and optimize product formulations, and troubleshoot problems.

Customer Service

Total's customer support is ongoing – from initial qualification through product delivery, highly experienced Account Coordinators excel at understanding and responding to your service needs. Centrally located in Houston, Texas, this team of skilled professionals is integral to our approach of offering not just products for your applications, but solutions to your business opportunities.
