

Health, Safety and Environmental Policy

Total Petrochemicals USA, Inc. considers safety and protection of health and the environment as core values that are essential to the long-term success of our business. We shall conduct our operations in a manner that protects the safety and health of our employees, contractors and the public and the quality of the environment. Consistent with our commitment to Responsible Care[®], we will seek continuous improvement in health, safety and environmental (HSE) performance with a vision to eliminate accidents and environmental incidents. No economic priority shall overrule consideration of health and safety at work or respect for the environment. In support of this policy, we will:

- Design and operate facilities in a manner that ensures operational safety, optimizes resource conservation, reduces waste and emissions and minimizes, to the extent practical, adverse impact on health and the environment.
- Comply with applicable laws, regulations, codes and standards and provide monitoring to ensure compliance.
- Establish effective internal HSE management systems and routinely evaluate their performance.
- Integrate the principles of sustainable development into our decision-making.
- Establish a framework for setting and reviewing HSE goals, objectives and targets.
- Provide periodic review and testing of emergency procedures and respond promptly and effectively to emergencies.
- Consider contractor and supplier compliance with these principles in their selection and performance evaluation.
- Produce, market and distribute only those products that, when properly used, will not pose an unreasonable risk to health and the environment.
- Communicate to employees, contractors, customers, and the public, as appropriate, the known hazards of our products and operations and practice effective product stewardship.
- Support and encourage research programs that promote good science and seek reasonable solutions to HSE problems.

The management of each operating unit is directly responsible for implementation of management systems and for training to ensure conformance with this policy. All employees have a personal responsibility to adhere to this policy, and HSE performance shall be an important element in the evaluation of employee performance.

Bernard Claude
President and Chief Executive Officer
