## Carville Styrenics Complex – Styrene Monomer Plant

### History

Total Petrochemicals USA, Inc. operates a styrene monomer facility, which is the largest facility of its type in the world. The plant was built in 1968 and is a 50/50 joint venture with SABIC Petrochemicals Holding US, Inc.

### Capacity

2.6 billion pounds (1,180 ktons) per year

### Differentiation

Located next door to Total Petrochemicals' Polystyrene Plant, resulting in excellent supply logistics.

### Integration

Total Petrochemicals USA, Inc. is integrated in benzene (Port Arthur Refinery) and ethylene (BASF FINA Petrochemicals Limited Partnership naphtha steam cracker in Port Arthur, TX). Styrene production is captive supply for the adjacent Total Petrochemicals USA, Inc. Polystyrene Plant.

### Product Uses

Used as a feedstock to produce polystyrene.

### Safety and Environment

- RC 14001 certified.
- ISO 9001 certified.
- Industrial Safety Rating System Level 9.
- Excellent Safety record.

### Community Involvement

- Major March of Dimes sponsor.
- Member of an Industry/School committee.
- Adopts local families during the holiday season
- Sponsors Total Petrochemicals/Charter Member of East Iberville – Industry Neighbor Companies (INC).
- Participates in a local Community Advisory Panel.
