

HEALTH, SAFETY AND ENVIRONMENTAL POLICY

TOTAL PETROCHEMICALS USA, INC. shall conduct operations at its Carville Styrenics Complex in a manner designed to protect the environment and the health and safety of employees, neighbors, customers and others who may be affected by the Complex's operations, products or services. Consistent with our commitment to Responsible Care® and RC14001, we will seek continual improvement in health, safety, security, and environmental performance with a vision to eliminate accidents and environmental incidents. A commitment to cost-effective performance improvement in these areas is essential to the long-term success of our business. No economic priority shall overrule consideration of health and safety at work or respect for the environment.

In support of this policy, the Styrenics Complex will:

- Comply with all applicable laws, regulations, corporate requirements, and legal standards and provide self-monitoring to ensure compliance.
- Provide employees with a safe and healthful workplace.
- Support the prevention of pollution and continual improvement of environmental and safety performance.
- Design and operate facilities in a manner that optimizes energy and material usage and minimizes, to the extent feasible, any adverse impact on health and the environment
- Respond promptly and effectively to emergencies, and in doing so minimize property damage.
- Produce, market and distribute only those products that, when properly used, will not pose an unreasonable risk to health and the environment.
- Communicate to employees, contractors, customers and the public, as appropriate, the known hazards of our products and operations and practice effective product stewardship.
- Support and encourage programs and research, which promote good science and seek reasonable solutions to HSE problems.
- Set and review safety and environmental objectives and targets and where practical, methods of measuring performance of such objectives and targets.

The management of the TOTAL Styrenics Complex is directly responsible for implementation of management systems to ensure conformance with this policy. All employees of the Styrenics Complex have a personal responsibility to adhere to this policy, and HSE performance shall be an important element in the evaluation of employee performance.
